Objective

I'm a passionate IT undergraduate at the University of Moratuwa with hands-on experience in full-stack web development. Skilled in React.js, ExpressJS, NextJS, MongoDB, and Java-based backend development. Eager to apply my technical skills in real-world projects, contribute to team success, and grow as a software engineer.

Experience

Botcalm (PVT) LTD | Intern Full Stack System Engineer (on-site)

September 2025 – Present

- Contributed to the design and development of scalable full-stack web applications.
- Built modern, responsive user interfaces using React.js / Next.js, Tailwind CSS, and Framer Motion for smooth animations.
- Developed and integrated RESTful APIs with MongoDB for efficient data handling.
- Implemented secure authentication using JSON Web Tokens (JWT) and role-based access control (RBAC).
- Managed frontend authentication flows, including token storage, session handling, and protected routes.
- Integrated NodeMailer for email notifications and Cloudinary for image storage and management.
- Deployed frontend applications using Netlify and full-stack applications using Vercel.
- Collaborated with senior engineers to debug issues, optimise performance, and enhance system reliability.

Education

University of Moratuwa, Bachelor of Information Technology (BIT)

August- 2022 - 2026

MR/ Narandeniya National School, G.C.E A/L Exam

2021

Projects

Worker Discovery and Task Management System (WDTMS)

- Developed a web-based platform that connects users with suitable workers for task-based services, improving accessibility and efficiency.
- Built features for user registration, worker discovery, task assignment, reporting, feedback management, and in-app communication.
- Implemented a smart worker matching system that filters and recommends workers based on location, task category, and real-time availability.
- Designed and enforced role-based access control (RBAC) for secure authentication and authorisation across multiple user roles (users, workers, admins).
- Integrated Gmail API to send automated email notifications for task updates, assignments, and user communication.
- Developed a responsive frontend using React.js and Tailwind CSS, and a robust backend using Java and Spring Boot.
- Used MySQL for structured and efficient data management.

Technologies Used:

React.js, JavaScript, Tailwind CSS, Java, Spring Boot, MySQL, Gmail API, Git

Villa Galle - Luxury Villa Booking Website

- Built a full-stack luxury villa booking website with server-side data fetching and dynamic content rendering.
- Designed and implemented an admin dashboard for managing rooms, gallery, site content, and guest inquiries
- Integrated Cloudinary for media management with a custom image upload component
- Implemented JWT authentication with HTTP-only cookies for secure admin access
- Modelled and managed data using MongoDB + Mongoose with multiple schemas (Room, GalleryPhoto, SiteContent, Inquiry)
- Built a fully responsive UI with a custom luxury design system.
- All homepage text and images are editable via the admin panel without code changes
- Deployed with Vercel using optimised server-side rendering and environment-based database connections.

Technologies Used:

Next.js, TypeScript, Tailwind CSS, MongoDB, JSON Web Tokens (JWT), Git, Vercel

Multi-Tenant HR Management System

- Built a centralised HR platform supporting multiple organisations within a single system.
- Designed an organisation-based (multi-tenant) architecture, enabling users to manage multiple companies under one account.
- Implemented JWT-based authentication and RBAC for secure, role-based access across organisations.
- Developed employee management, role assignment, and organisation-level access control features.
- Integrated email notifications for onboarding and system updates.

Technologies Used:

Next.js, Tailwind CSS, MongoDB, JWT, NodeMailer, Cloudinary, Git

Multi-Tenant Finance Management System

- Developed a finance management system integrated with the HR platform for unified operations.
- Enabled multi-company financial management within a single dashboard.
- Designed scalable database structures using MongoDB.
- Implemented document and image handling using Cloudinary.

Technologies Used:

Next.js, Tailwind CSS, MongoDB, JWT, NodeMailer, Cloudinary, Git

Technical Skills

Programming Languages:

JavaScript
TypeScript
Java
PHP

Frameworks & Libraries:

NextJS
ReactJS
ExpressJS
Springboot
TailwindCSS

Databases:

MongoDB
MySQL

Version control

Git
GitHub

Deployment tools:

Vercel
Netlify

Concepts:

OOP Concepts
ER Diagram
Class Diagram
Use Case Diagram

Certificate Courses

Higher Diploma – University of Moratuwa

2022 - 2024

- Bachelor of Information Technology

Aquinas College of Higher Studies

2025

- Spoken English for Professional Excellence
